

EMAIL 2FA

WHAT ARE THE MAIN VULNERABILITIES OF THIS 2FA METHOD?

If a malicious user gains access to your email account, they can perform a forgotten password action to gain a new password and then receive the two-factor code in the same email account.

HOW EASY IS IT FOR YOU USERS TO SET UP AND USE THIS METHOD?

Email 2FA is relatively easy for users to set up and use, as it typically involves linking a phone number or alternative email address to receive verification codes.

DOES THIS METHOD REQUIRE SPECIAL EQUIPMENT OR SOFTWARE?

Email 2FA generally does not require special equipment or software beyond access to an email account and a device to receive verification codes.

HOW DEPENDABLE IS THIS METHOD? ARE THERE COMMON PROBLEMS?

The dependability of Email 2FA can vary, with common problems including delays in receiving verification codes, potential for email service outages, and susceptibility to account takeover if email credentials are compromised.

WHAT HAPPENS IF THE USER LOSES

ACCESS TO THE 2FA METHOD?

If a user loses access to the 2FA method via email (e.g., forgotten password, email account compromise), they may need to rely on account recovery processes provided by the service or platform.

IS THIS METHOD WIDELY SUPPORTED ACROSS DIFFERENT SERVICES?

Email 2FA is widely supported across different services and platforms, making it a commonly used method for adding an extra layer of security to accounts.

CAN IT BE SET UP ON GOOGLE & FB & YAHOO & IG & DISCORD? IF YES, HOW?

Yes, Email 2FA can be set up on these apps by going to the "Security" settings in your, then selecting "2-Step Verification" and following the prompts to add your email as a verification method /phone number .
